

## Therapy Dog Prep Class Description

Learn what it takes to become an animal therapy team and volunteer in local hospitals, nursing homes, schools and other facilities! This three hour workshop will provide training and education for you and your dog to practice the skills required for Delta Society Pet Partners® program and to provide helpful hints on how to conduct successful visits.

This workshop will include an actual visit, for both you and your dog, to a facility for practical experience. "

Therapy Dog testing will be available to any dog/handler who would be interested in becoming "certified" in the therapy dog program. This therapy dog test will be conducted by a Delta Society Licensed Team Evaluator at an additional cost. Testing would be conducted at the same facility you registered for your therapy dog classes. The tests will be conducted shortly after every Therapy Dog Prep class offered by Teaching Dogs.

It is recommended that your dog have had some training in basic obedience and be dog and people friendly before registering for our Therapy Dog Prep class.

To learn more about the steps to becoming a Pet Partner®, visit
